About me

I am the Unicode support testing phrase with more than 20 years of experience in global international technology companies as well as small startups and flexible teams. I am well recognized by the Czech developers as I contain more diacritic characters than any comparable phrase. My strenghts are user friendliness, beeing cute (who would not like yelowish horse?) and beeing able to spot mistakes in Unicode character handling.

I am not looking for the job as I am widely deployed in many source codes all around the world.

Education

Czech Academy of Sciences, Czech Language departenment
specialization *National character support in computer equipment*,
Masters degree, 1991

Work experience

Unicode support tester

[All software developers](#), [LTD](#), Czech republic

1.1.1991 - (present)

Short Unicode testing phrase. Can be used to test the support of extended ASCII or non Unicode encodings like Windows CP 1250. Still useful in 21st century, because some systems breaks on non-ASCII input or broke non-ASCII outputs a lot. Compatible with C, C++, Java, Python, Perl, Ruby, .NET, Lisp, Haskell, Cloud, CSS, Html, Javascript, SQL, PHP, Cobol, Fortran. Used by many top notch companies in their tests.

Side projects

Ice cream maker

Making the best ice cream! Ever!

Languages

English - nothing, completelly incomprehensible by English speakers.

Czech - Native sentence, use most of diacritics

Technical Experience

Programming languages: Java, C, C++, Python, C#

Project management: Waterfall, SCUM, Kanban, Gant charts

Computer programs: MS Office, Adobe InDesign, Oracle Database

Marketing: Communication, negotiation, stress management

Personality traits, other skills

Analytical thinking

Usefull phrase

Team player
